Data Collection Plan & Raw Data Sources Identification Template

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

Data Collection Plan Template

Section	Description
Project Overview	The project aims to build an interactive analytical dashboard that combines demographic, behavioural and lifestyle attributes from smartphone usage data to uncover patterns of digital addiction, identify high-risk user segments, and support product, research and well-being stakeholders.

Data Collection Plan	Primary data will be collected from the provided Smartphone_Usage.csv file. No additional external APIs or real-time streams are required for the current scope. Future enhancements may include anonymised mobile telemetry or survey responses, but these are out of scope for this phase.
Raw Data Sources Identified	One primary structured dataset has been identified and validated. Details are listed in the Raw Data Sources table below.

Raw Data Sources Template

Source Name	Description	Location/URL	Format	Size	Access Permissions
Smartphone_Usage.csv	Structured dataset of 7,500 young-adult users (age 18–35) containing demographics, daily/weekend screen time,	Local project repository /attachments/ Smartphone_Usage.csv	CSV	~0.6 MB (7,500 rows × 16	Team internal – full read access for analysis
